

### Barrel Strip Back Lengths

1.- The FCI stripback lengths of the samples are in specification but very close to the maximum permitted: 81.5, 81.5, 82.5, 80.5, 82, 82mm (specification from 78 to 83mm).

2.- Our proposition is to fix 0mm difference as a target, with the following tolerances:

	<i>FCI (DimA)</i>	<i>JST(DimB)</i>
<b>Short length</b>	78mm (-0mm,+5mm)	DimA (-1mm, +2mm)
<b>Middle length</b>	117mm (-0mm,+5mm)	DimA (-2mm, +2mm)
<b>Long length</b>	157mm (-0mm,+5mm)	DimA (-2mm, +2mm)
